

## SOLVENT BASED CLEANER

# MBO SOL-KLEEN 305

**MBO SOL-KLEEN 305** is a general purpose solvent based cleaner that exhibits good solvency power for use in electronics and electrical applications.

The product is designed to remove:

- Rosin based flux residues from component parts or equipment
- Solder paste residues from PCB's, tools and stencils
- Grease and oils

It is particularly good at removing flux residues from PCB's and production equipment such as carriers, tools and jigs.

It is also suitable for cleaning of solder paste residues from stencil surfaces following misprints and associated tooling and equipment.

The product is biodegradable however approval should still be obtained from the local water authority prior to disposal into the foul sewer system. Do not dispose of directly into watercourses or rivers

### Technical Data:

Appearance: Clear liquid  
Odour: Solvent base  
SG @ 25°C: 0.785  
Solubility: Soluble in solvents,  
insoluble in water  
Compatibility: Safe on most plastics and  
metal surfaces  
Flammability: Flammable - Flash Point  
12C  
Packaging: 5, 10 & 20 litres containers

### Applications:

The product can be used either manually with brushing or in static baths. Suitable for use in ambient conditions. Over a period of time some product will be lost by evaporation and as such may require topping up with fresh material.

Always use in a well ventilated area away from any sources of flame or ignition.

### Storage:

The product may be stored at ambient temperatures preferably in a metal cupboard. It has a shelf life of 12 months under correct storage conditions.

### Health and Safety:

Health and Safety sheet available separately.

### Technical Service:

MBO provides a technical support service and maintains a constant programme of research and development. We are able to assist customers by specific product development to meet particular requirements.
